

Need help managing your NHS healthcare?

We're testing a new process to make it easier for you to allow a trusted person to access online GP services on your behalf.

Your trusted person can apply using a simple online form. If you and your doctor agree, they may be able to:

- see your NHS information online
- book appointments
- manage your repeat prescriptions
- contact the surgery for you

Do you want to find out more?

- invite your trusted person to visit www.nhs.uk/apply-for-proxy which will take them to the application form
- or scan this QR code 

You can also ask at the front desk for a leaflet with the QR code.
